

LOCUS CALOCUS Electronic Report Descriptions

Level of Care Utilization Report Parameters

Reports the number of consumers who have utilized each level of care by year and facility.

New Patient Report Parameters

Reports specific consumer level of care data by monthly, year or period. Data provided includes patient name, level of care disposition, date of disposition, clinician. Data can be sorted by diagnosis (if provided), facility, date, level of care and consumer name.

Variance Report Parameters

Reports type and number of variation in recommended and actual levels of care by consumer, clinician and facility on a monthly, annual, and/or periodic basis. Data can be sorted by “reason for variance,” level of care and consumer name.

Dimension Scores Report Parameters

Reports the number of tests and average scores on each of the Level of Care dimensions by clinician.

Level of Care Change Report Parameters

Reports the number and percentage of consumers who have changed to lower or higher levels of care, and those who have not changed, by month, year or period. This is sorted by facility, specific level of care, and facility.

Level of Care by Diagnosis Report Parameters

Reports level of care by diagnosis for the month, year or period.

Overdue Patients Reports Parameters

Reports overdue and pending Locus/Calocus evaluations by clinician and/or facility. Data provided includes consumer name, date report was due, number of days past due, last assessment, clinician and consumer’s level of care.
